

# Custom Decal/Wall Graphic Installation Guide

WET METHOD (FOR LARGE APPLICATIONS):

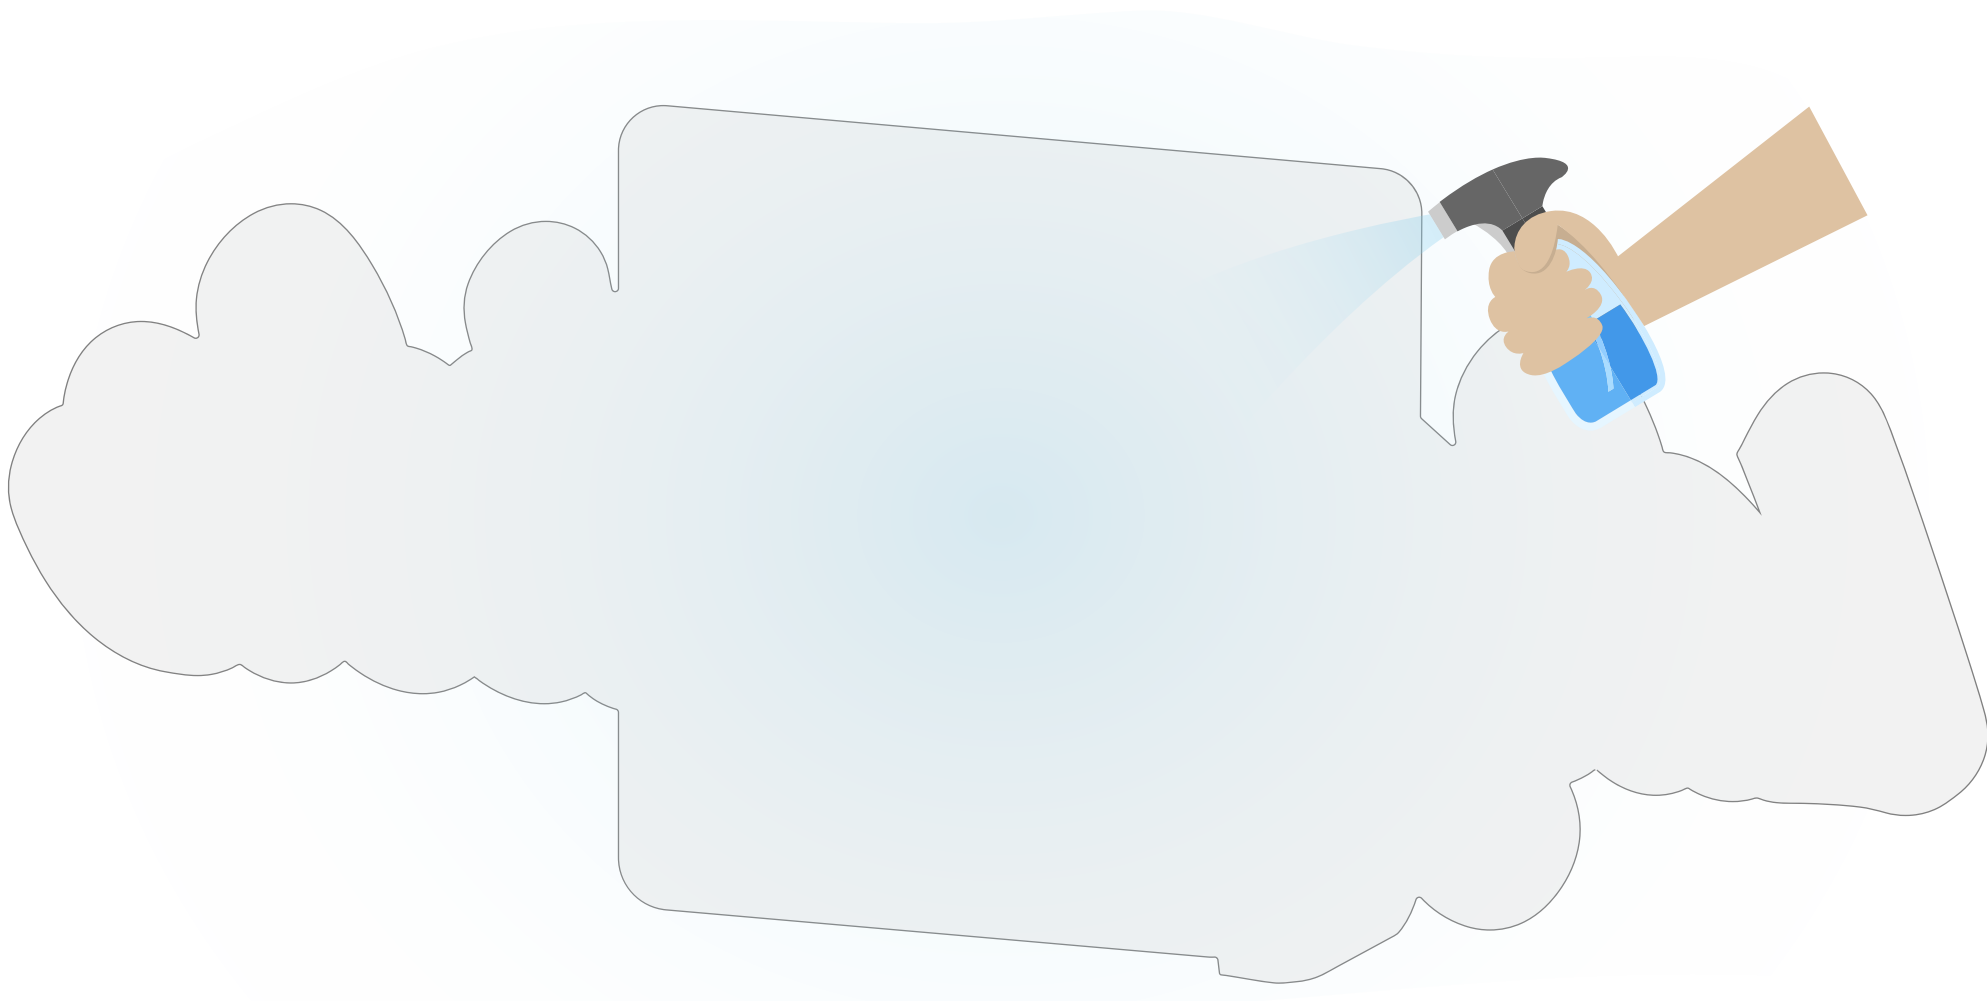

- 1 Clean the surface to which the decal is to be applied.

- 2 Peel off the backing paper of your decal.

- 3 Spray application fluid onto the adhesive side and to the desired surface which your decal will be applied on.

- 4 Apply your decal onto the surface and adjust its position to your preference.

- 5 Squeegee out the fluid and bubbles working from the center to the edges. Spray more application fluid on to the decal to make the squeegee glide smoothly.

- 6 Repeat this process until you have remove most of the fluid and bubbles.
